3.PREAMBLE TO THE DESCRIPTION:

-Mar-2022/26014/202241016055/Form 2(Title Page)

:

In this fast developing world it is very important that we create a Smart/User friendly information system, which when used will help the citizens to perform their tasks in a very smart way. In this scenario the invention of Authentic and Pre-informative parking system is designed.

Fishing for the parking slot has become more common in this congestion world (Thickly populated). This fishing activity not only creates problems in terms of wastage of time and energy, but also creates problems related to wastage of oil resources. Smart, authentic and pre-informative parking system will help in optimizing the parking space used and will also decrease the amount of time required to park the vehicle making the traffic flow in smoother way.

This system will provide the user with complete end to end solution for all the
